

migration-center for Veeva Vault – Certified migration product overview

Veeva has assessed and technically certified fme's migration-center, a content migration platform for complex migration scenarios. migration-center enables Life Sciences organizations worldwide to reduce cost, manage risk, increase productivity, and accelerate content-centric application deployments by delivering a product for complex migration scenarios. It carries out highly automated, large volume migrations without system downtime, 100 % out-of-the-box, fully documented, easy to deploy, and without additional programming or scripting effort. Based on over 20 years of project experience, fme is able to provide a product and service offering, which has proven its quality in thousands of migration projects around the world, even in highly regulated environments. Through its enormous flexibility and the predefined migration methodology, migration-center may be deployed for a variety of migration scenarios and lowers the project duration tremendously.

Migration methodology

fme Life Sciences is a leading provider of business and technology services supporting the deployment of content services and ECM solutions to its clients in the Life Sciences industry. We act as a trusted advisor and systems integration specialist across the Clinical, Regulatory and Quality and Manufacturing domains in Europe and North America.

The fme Life Sciences team supports our clients with migration project services utilizing the fme migration-center product. Whether you need support in a specific business area, or you require someone to manage the entire migration project in a full service agreement, our Migration Services team is equipped to deliver the highest quality results.

Our team consists of developers, project managers, migration specialists and communication experts. Through our proven methodologies and best practices, precise communication and the fme Centers of Excellence in the US and Europe we are able to provide high quality outcomes, while always keeping an eye on cost optimization.
